VeloMini

electric
folding
bicycles are
small, light

weight, versatile, convenient, and durable. They fold down so small and you can take it with you practically everywhere.

VeloMini is the right bike for your lifestyle. Whether you live in the suburbs, the city, on campus, or near the harbor, the VeloMini will make getting around in style a little easier, and a lot more fun.

VeloMini represents the latest technology in light-weight folding electric bicycles. The powerful 180 watt motor will transport you up to 12 mph without pedaling. It folds to 18 inches high and fits into its own carrying case. The VeloMini is powered by a Lithium-Ion battery hidden in the durable anodized aluminum frame.
